

CORDLESS PHONE TECHNOLOGY BENEFITS

Uniden's new DSS 7900 Series will provide you with Optimum Clarity and Security. Clarity is the most important feature that determine people's satisfaction with their cordless phone. Uniden's Digital Spread Spectrum phones provide unparalleled cordless phone clarity. They deliver better voice clarity with less static noise than any analogue or digital alternative.

Spread spectrum phones 'spread' the transmission signal between the cordless handset and receiver across several frequencies. This technology makes the signals almost transparent and so practically impossible to intercept. This characteristic of DSS technology is what led the military to originally develop the technology.

KEY BENEFITS Optimum Clarity, Superior Technology, Wireless (WiFi) Network Friendly, Premium Performance, Capabiltiy for up to 10 handsets.

Uniden's new WDSS 5300 Series is derived from DSS Technology and will provide Optimum Clarity. Frequency Hopping Spread Spectrum is an advanced digital technology that sends its transmissions over a different carrier frequency at different times. The signal hops in a pseudo random pattern across the entire band. This helps it avoid any interfering signals and hence delivers a high voice clarity and security.

KEY BENEFITS Optimum Clarity, Sleek European Styling, Clear Natural Speech, Wireless (WiFi) Network Friendly, Large Navigation Key.

Uniden's Long Range DSS phones use a clarity booster to offer superior clarity and the longest range available in digital technology. Advanced features include operating up to 4 handsets using the one phone socket, remote access to the answering machine and even two way communication between the handsets anywhere without the base.

KEY BENEFITS Longest Digital Range, Superior Clarity, Advanced LCD Display, Digital Duplex Speakerphone, Multi (4) Handset Capable.

Uniden's new WDECT 3300 Series is exclusive to Uniden and provides even better performance and high value. The WDECT series of cordless phones has been the No. 1 selling range of cordless phones in the Australian and New Zealand markets since its introduction 3 years ago.

KEY BENEFITS Wideband Digital Technology, Exclusive to Uniden, Increased Talking Range, Wider Bandwidth, Robust Performance.

Uniden's new DECT 6000 Series design is derived from the cutting edge American DECT 6.0 Technology and engineered specifically to meet Australian and New Zealand standards. These futuristic styled phones are ideally suited to high density living environments and have a comprehensive array of features suitable for any household. They have enhanced talking range, unique styling, a large backlit LCD display and are Wireless (WiFi) Network Friendly.

KEY BENEFITS Designed for interference free communication, Large Backlit LCD Display, Futuristic Design, Wireless (WiFi) Network Friendly, Wall Mountable

Uniden's SCR Technology phones use a shorter wavelenght to deliver clear sound and all the essentials. They are well suited to two-storey and single level apartments. The easy to use features and large handset make them a very economical phone well suited to all age groups.

KEY BENEFITS Crystal Clear Maxi sound, Exclusive SCR Technology, High Gain Compact Antenna, Rocket Dial.
